DETAILED ACTION

Response to Amendment

1. This action is in response to the amendment mailed February 19, 2003.

Claim 10 was added rendering claims 9-10 pending.

Claim Rejections – 35 USC § 102(b)

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 9 is rejected under 35 U.S.C. 102(b) as being anticipated by Inamura et al. (U.S. 5,342, 189).

4. Inamura discloses an extrusion die slit with an entry-side and exit region (column 5, lines 10-23) where the entry opening of the die is the port area (column 8, lines 30-33). Figure 2 depicts parallel exit slits and a plurality of exit ports.

Claim Rejections – 35 USC § 102(b)

5. Claim 10 is rejected under 35 U.S.C. 102(b) as being anticipated by Ramanathan et al (U.S. 5,269,995).

Art Unit: 1774

6. Ramanathan discloses a composite formed of alternating layers of differing thermoplastic material parallel to one another which are passed through an extrusion die (column 3, line 48 through column 4, line 22). 'The extrusion die...adapted for producing a multilayer plastic composite by a method' and '...said method comprising coextruded plastic A and plastic B through said die, wherein said coextruding plastic A and plastic B comprises forming a pair of fluid streams of plastic A by passing a fluid stream of plastic A through said pair of parallel exit slits and forming a plurality of fluid streams of plastic B with gaps between each stream of said plastic B by passing a fluid stream of plastic B through said plurality of exit ports, so that said fluid streams of said plastic A exit said pair of exit slits and said fluid streams of plastic B exit said plurality of exit ports in such a manner to result in a portion of said fluid streams of said plastic A passing through said gaps between each stream of said plastic B to effect fusion of said pair of fluid streams of said plastic A, to obtain said composite' are product by process claim limitations. "Even though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process." In re Thorpe, 777 F.2d 695, 698, 227 USPQ 964, 966.

Response to Arguments

7. Rejection of claim 9 made under 35 USC 102(e) as being anticipated by Kodama et al. (U.S. 5,876,804) has been withdrawn due to arguments by Applicants regarding the filing date of the reference. Rejection of claim 9 made under 35 USC 102(b) as being anticipated by Gibbon (U.S. 4,182,606) has been withdrawn due to arguments made by Applicant.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
